CCIAA 261451 MEC.M 137105

Weight of rotor with mounting frame max. 200 kg

Load capacity per bearing pedestal max. 150 kg

Minimum rotor weight unlimited

Length of the machine base 2000 mm

Distance between the centres 1830 mm  
of the bearing pedestals

Distance between upper edge of the base and upper edge of the bearing bridge 430 mm

belt driven diameter based upon a rotor axis height of 530 - 630 mm above the machine base 30-300 mm

Balancing speed range based upon 100 mm belt driven diameter 360-3600 min-1

Max. belt speed 95 m/s

Max. transferable power at max. belt speed 8 kw
